## Retrospective - Irene Froy - The Seeing Eye

To introduce Irene - Carole told us that we had a treat in store - and how right she was. Irene quickly proved that she really does have the "Seeing Eye" - something that some are born with, and some have to develop. Having been a photographer for nigh on 40 years - her first image was quite stunning - but one she openly admitted was a little "Point and Shoot" - and the judge saw more in it than she did. As she developed over the years - she realized that you have to get your priorities right - a lesson for all - if the image looks right - stop and take it there and then. The tea break can wait - as the light can change and alter the dynamic of the image.

Not only did Irene share some wonderful tips on photography, and some great stories that accompanied her journeys to take the pictures - she also advised on different papers to use. Titanium paper leave a hard image with it's silvery surface - but great for mono. Also wonderful to accentuate images where you have something shiny in it.

If you have a lot of empty space - use parchment paper to give the image some texture.

Along with her seeing eye, some judicious use of Photoshop and highly engaging stories of how the images were captured - we were treated to a great night that all members seemed to enjoy.

To conclude Carole thanked Irene for coming, and also George for booking her. Some of the tips could be used at this weekend's trip to Westonbirt. Especially if the weather doesn't play ball - don't let it put you off - as the light in-between showers is sometimes the best light that you'll get.
